Click here.

MEDLINEplus® (NLM's Consumer Information page)

- On October 22, 1998 NLM launched a consumer health home page called **MEDLINEplus**.
- Designed to direct consumers to resources containing information that will assist in researching their health questions.
- The pages are designed for education use only and are not intended to replace advice from a health professional.
- These pages provide a carefully selected list of resources, not a comprehensive catalog.

Click on the MEDLINEplus image on the right-hand side of the NLM home page:

A screenshot of the MEDLINEplus Health Information website. The header features the title "MEDLINEplus Health Information" in large purple letters, with "A service of the National Library of Medicine | National Institutes of Health" below it. To the left is a search bar with a "Go" button and links for "Advanced Search", "Site Map", and "About MEDLINEplus". The main content area is divided into two columns. The left column has five sections: "Health Topics" (information on conditions, diseases and wellness, plus a medical encyclopedia), "Drug Information" (generic and brand name drugs), "Dictionaries" (spellings and definitions of medical terms), "Directories" (locations and credentials of doctors, dentists and hospitals), and "Other Resources" (access to organizations, consumer health libraries, international sites, publications, MEDLINE and more). The right column has two sections: "Current Health News" with a list of links including "CDC Revises TB Treatment Guidelines After Deaths", "For-Profit Nursing Homes Offer Worse Care", "Type 1 Diabetes May Be Preventable, Three Research Teams Report", and "More news"; and "Featured Site" which highlights "ClinicalTrials.gov" with the text "Information about clinical research studies". At the bottom, there is a navigation bar with links for "Health Topics", "Drug Information", "Dictionaries", "Directories", "Other Resources", and "We welcome your comments". Below this bar is the address "U.S. National Library of Medicine, 8600 Rockville Pike, Bethesda, MD 20894", the text "National Institutes of Health, Department of Health & Human Services", and a link to the "Copyright, Privacy, Accessibility, Freedom of Information Act".

The National Network of Libraries of Medicine®

Medical libraries throughout the United States are joined together in a network. The purpose of the National Network of Libraries of Medicine (NN/LM®) is to provide health science practitioners, investigators, educators, and administrators in the United States with timely, convenient access to biomedical and health care information resources.

- The network is administered by the National Library of Medicine.
- It consists of eight Regional Medical Libraries (major institutions under contract with NLM), and some 4,500 Primary Access Libraries (primarily at hospitals).
- The Regional Medical Libraries administer and coordinate services in the network's eight geographical regions.

NN/LM Web site: <http://nnlm.gov>

Toll free phone number: 1-800-338-7657

Document Delivery

Loansome Doc® offers full-text document ordering. This feature is part of PubMed and the NLM Gateway.

DOCLINE® is the computerized interlibrary loan system that is the foundation for Loansome Doc.

More information on Loansome Doc and DOCLINE may be found on factsheets found at the NLM Web site:

Loansome Doc: www.nlm.nih.gov/pubs/factsheets/loansome_doc.html

DOCLINE: www.nlm.nih.gov/pubs/factsheets/docline.html

NLM Technical Bulletin

- A bi-monthly newsletter published for NLM online searchers.
- The *NLM Technical Bulletin* keeps searchers apprised of:
 - changes and enhancements to NLM retrieval systems
 - changes to MeSH vocabulary
 - tips for searching
- The *Technical Bulletin* is published electronically on the NLM Web site. Its URL is:

<http://www.nlm.nih.gov/pubs/techbull/tb.html>
